Fedi Limem

AI & Data Science Engineering Student — Seeking a final-year internship from early 2027

01 PROFILE

Final-year (3rd year) engineering student specialising in AI and Data Science (ITEAM, Tunis). Coming from IoT and embedded systems, I now work on LLMs: LoRA fine-tuning, RAG assistants and agents that cite their sources, constraint optimisation and infrastructure automation. I am looking for a final-year internship (PFE) in generative AI, LLMs or Data Science starting in early 2027.

02 TECHNICAL SKILLS

- **Generative AI & LLMs:** fine-tuning (LoRA), RAG, LLM agents, structured outputs (Zod), prompt engineering, Qwen2.5-Coder, Gemini API, GPT-4o mini (GitHub Models), vector search (Qdrant)
- **Machine learning, data & optimisation:** Python, Random Forest, XGBoost, data cleaning, exploration and modelling, constraint programming (OR-Tools CP-SAT)
- **DevOps & automation:** StackStorm, HashiCorp Vault, Docker, Grafana, microservices, Telegram Bots (ChatOps), Git/GitHub, pytest
- **Web:** Next.js, React, TypeScript, FastAPI, Prisma, Gradio, GSAP, JavaScript, PHP, Symfony, Java/JavaFX, HTML/CSS
- **Databases:** PostgreSQL, MySQL, SQL Server, SQLite/libSQL · **IoT & embedded:** Arduino, ESP32, sensors, real-time monitoring

03 PROFESSIONAL EXPERIENCE

DevOps & AI Automation Intern — Wind Consulting *Mar – Apr 2026*
Designed a secure ChatOps platform controlled from Telegram (see project below).

AI Intern — Talan Tunisia *Jun – Aug 2025*
Fine-tuned an LLM specialised in software engineering best practices (see project below).

04 PROJECTS

LMAgent — AI cover letter agent NEW *Personal project · 2026*
Writes a cover letter tailored to each job offer from a CV (PDF or photo): structured profile extraction, offer analysis, drafting where every sentence cites its source in the profile, critical review, rewrite and PDF export. Skills missing from the CV can never be claimed. (github.com/fedifedifedi/LMAgent) **Next.js · TypeScript · Gemini · Zod · Prisma · libSQL · GSAP**

Fedi's Planner — Timetabling through optimisation NEW *Personal project · 2026*
Builds conflict-free school timetables (CP-SAT solver): exact reformulation of room constraints (14× fewer variables, 6 to 8× faster solving), scores 3 to 6× better than a greedy baseline, infeasibility explained by a minimal set of conflicting constraints, minimal-change replanning for absences. (github.com/fedifedifedi/fedis-planner) **Python · OR-Tools · FastAPI · Next.js · pytest**

AI ChatOps platform *Wind Consulting · 2026*
Engineers operate the infrastructure from Telegram: 16 microservices orchestrated with StackStorm, secrets in Vault, Grafana monitoring, Qdrant vector memory and a RAG layer (GPT-4o mini) answering operational questions. **StackStorm · RAG · Qdrant · Vault · Docker · Grafana**

LLM fine-tuning — Best-practices assistant *Talan Tunisia · 2025*
Qwen2.5-Coder-0.5B adapted with LoRA to software best practices (Java, SOLID, Clean Code, Git, SonarQube), served through an interactive Gradio chatbot with conversation history. **Qwen2.5-Coder · LoRA · Gradio**

PrediT'Kick — Football analytics and prediction *ITEAM · academic project*
Analytics platform built on 9,048 FIFA 23 players, 245 teams and 58,892 real matches; 81% accuracy on predicting player positions. **Python · Random Forest · XGBoost**

DocBot — RAG assistant for SMEs *Personal project*
Companies query their own documents in natural language, with answers grounded in their files. Deployed on Railway (github.com/fedifedifedi/docbot). **RAG · Next.js · Prisma · PostgreSQL**

Other projects: DiagSein IA (ML-based breast cancer diagnosis support, ITEAM) · AI study assistant (course PDFs → sourced answers, quizzes, spaced repetition) · KπBIOS (AI, data & IoT decision support) · Smart Water Management (water consumption monitoring and real-time alerts, IoT) · TaskApp (task management, github.com/fedifedifedi/taskapp).

05 EDUCATION

Engineering degree (2nd and 3rd year) — AI & Data Science, ITEAM University, Tunis *2025 – 2027*
Engineering degree (1st year) — Computer Engineering, ESPRIT Monastir *2024 – 2025*
Bachelor's in Computer Systems Engineering — IoT & Embedded Systems, ISI Mahdia *2024*
Baccalaureate in Experimental Sciences — Ksour Essef High School *2021*

06 CERTIFICATIONS, LANGUAGES AND INTERESTS

Certifications: Generative AI & LLMs — Udemy (Hadelin de Ponteves) · Python and SQL — Udemy · Python Programming — Spectrum Training Center (2022)
Languages: Arabic (native) · French (fluent) · English (intermediate) · Spanish (intermediate)
Interests: Football · AI and tech watch · Video editing and content creation
