LETTER OF RECOMMENDATION

To Whom It May Concern,

It is my great pleasure to recommend **Mr. Fedi Limem**, who has worked with Tradrly IT Solutions as a freelance Data Scientist on a number of our artificial intelligence projects. As the founder, CEO and CTO of Tradrly, I personally lead the data science activity of our studio, which gave me the opportunity to work closely with Fedi, review his work in detail and observe his growth first-hand.

Tradrly is a Tunis-based software studio delivering AI, web and mobile solutions to clients in Tunisia, Saudi Arabia, the United States, Spain and the United Kingdom. Our projects demand not only solid technical skills, but also rigor, autonomy and the ability to deliver production-quality results under real client constraints. Fedi consistently met — and often exceeded — these expectations.

Throughout our collaboration, Fedi contributed across the full data science lifecycle, from understanding the business problem to delivering working models. In particular, I would highlight:

- **Strong technical foundation:** excellent command of Python and the core data science and machine learning stack, with solid understanding of both classical machine learning and deep learning approaches.
- **End-to-end delivery:** data collection and cleaning, exploratory analysis, feature engineering, model design, training, evaluation and iteration — always with careful attention to data quality and sound validation.
- **Practical problem-solving:** the ability to translate a client need into a well-framed technical problem, choose the right approach rather than the most fashionable one, and explain his results clearly to both technical and non-technical stakeholders.
- **Autonomy and reliability:** as a freelancer, he managed his work independently, respected deadlines and kept the team informed, while integrating smoothly with our developers and project management workflow.
- **Learning agility:** he picks up new tools, frameworks and domains remarkably quickly, which is essential in a field that evolves as fast as AI.

Beyond his technical abilities, Fedi is a pleasure to work with. He is curious, humble, and receptive to feedback, and he takes genuine ownership of the quality of his work. He communicates professionally and contributes positively to the team spirit — qualities that made him a valued collaborator on every project he joined.

For all these reasons, I recommend Fedi Limem **strongly and without reservation** for any data science, machine learning or AI position, as well as for any academic program or research opportunity he may pursue. I am confident he will be a valuable asset to any organization or institution fortunate enough to have him, and Tradrly would gladly work with him again.

I remain available to provide any further information regarding his work and qualifications.

Sincerely,

Salah Sammari
